Dear members of the admission committee,

It is my pleasure to write this letter of recommendation to support my former student **Ms. Shima Pirasteh** for her application to the Master program at your University. I consider myself to be pivotally placed to judge her aptitude and caliber. Her talents and skills, I believe, make her an ideal candidate for graduate studies in such programs related to Architecture and Design.

I got familiar with Shima's capacities in courses like "Architectural Design", "Environmental control of building" and "Mapping and Planning of Historical Monuments" at Mazandaran University. She has a grasping capability that helps her understand intricate details essential in both Architecture and Sustainable Design. e.g. Her class research subject choice of Human Five Senses in Architecture and the way she proceed it, detailed 3D Modeling of a complicated Karbandi (which is the structure of a kind of roofing in Persian Architecture), the unique concepts of design which came to her mind and the process of transforming them to architectural forms in order to represent her ideas faithfully as well as paying attention to the project site challenges, in addition to sensitivity and responsibility about environmental issues and a thirst to scientific subjects related to low energy architecture. All of these examples can be mentioned as proof of Shima's eligibility.

Her talents coupled with her devotion to Art and Design have helped her go a long way in this field. Evaluating her works over years shows her to be an exceptionally creative researcher as well as a diligent architect. Besides being a natural in Architecture, Shima has a true passion for research and enjoying the process that allows her ambitious mind to express revolutionary yet practical ideas. I stand as a guarantee for her expertise in comprehension of Design Approaches and Architecture in particular. I strongly recommend her for admission and scholarship for the master program at your University.

Sincerely yours,

Dr. Mostafa Gholipour Gashniani
Assistant Professor

Faculty of Art and Architecture
University of Mazandaran, Babolsar, Iran
