Re: Ms. Shima Pirasteh

Letter of recommendation

I am pleased to write a letter of recommendation for Ms. Shima Pirasteh to support her application. I know Shima through her brilliant performance under my supervision on the Final Design Project of "Residential Complex with a Sustainable Design Approach" for her bachelor's degree at Mazandaran University. During her research and design experience, Shima demonstrated exceptional talent, great motivation, and a can-do attitude, qualities crucial to every research project.

The intelligence and interest in her studies have made Shima a unique undergraduate student. As a sample, she learned DesignBuilder (a simulation software to assess the environmental performance of buildings) on behalf of the accuracy of her project's results that represented her enthusiasm in applying high accurate methods to what she was researching. Therefore I suggested she take part in a research project for building Energy simulations (published in the Iranian Journal of Energy). Her responsibility and patience as well as positive interaction with others make Shima an asset to every research team.

Regarding all the facts, especially her exceptional research abilities and achievements, I am sure that Shima is qualified and has a strong potential for outstanding work as a graduate student. I strongly recommend Shima Pirasteh for admissions and any financial aid available at your university.

Sincerely yours,

Maria Kordjamshidi, PhD

Assistant Professor

Faculty of Art and Architecture, The University of Mazandaran Babolsar, Iran
